  story description task, Down's syndrome, 165
  voice, speech, Prader-Willi syndrome, 302
Life domains, objective and subjective indicators, quality of life, 126

Maladaptive behaviours, health survey, dementia, 481
Men with intellectual disabilities, sexual abuse, 215
Menopause, Down's syndrome, 264
Mental disorders, 440
Mental health care, psychiatric services, service consumption, 512, 519
Mobility, internal conditions, cancer, ageing, 8
Mortality, avoidable death, self-injurious behaviour, 252

Neonatal complications, obstetric optimality, autism, 81
Neuroleptic malignant syndrome, summer, 273
Normalization, quality of life, disability policy, Norway, 120
Norway, disability policy, normalization, quality of life, 120
Nutritional support, dysphagia, community care, 430

Subject Index

Objective and subjective indicators, quality of life, life domains, 126
Obstetric optimality, neonatal complications, autism, 81
Old age, health and social services, psychiatric disorders, 331
Open label study, paroxetine, depression, 268
Opioid hypothesis, body site preference, self-injurious behaviour, 456
Opportunistic health screening, randomized control trials, primary health care, 409

Parental perceptions, expressive pragmatic skills, Down's syndrome, 19
Parental role, grown-up children, day-to-day activities, 285
Parenting stress, social-emotional development, Cornelia-de-Lange syndrome, 70
Paroxetine, depression, open label study, 268
People's Republic of China, classification, prevalence, prevention, 180
Personality disorders, psychiatric services, community survey, 324
Phenylketonuria, executive functions, psychosocial adjustment, 317
Polypharmacy, antipsychotic drugs, prescribing, 339
Population survey, cancer, death rates, 312
Prader-Willi syndrome, voice, speech, language, 302
Pregnancy, birth complications, schizophrenia, 238
Prescribing, polypharmacy, antipsychotic drugs, 339
Prevalence, 440
Prevalence
  classification, People's Republic of China, prevention, 180
  chronic health problems, incidence, 42
incidence, chronic health problems, 42
  Journal of Intellectual Disability Research, randomized control trials, 232
  People's Republic of China, prevention, classification, 180
  prevention, classification, People's Republic of China, 180
  randomized control trials, *Journal of Intellectual Disability Research*, 232
Preventative health strategies, education, smoking education, 416
Prevention, classification, prevalence, People's Republic of China, 180
Primary health care, 363
  evidence base, 365
  health checks, health gain, 401
  health gain, health checks, 401
  opportunistic health screening, randomized control trials, 409
  randomized control trials, opportunistic health screening, 409
Problematic behaviours, 440
Psychiatric disorders, old age, health and social services, 331
Psychiatric services
  community survey, personality disorders, 324
  mental health care, service consumption, 512, 519
  personality disorders, community survey, 324
  service consumption, mental health care, 512, 519
Psychological well-being, challenging behaviour, staff, 502
Psychopharmacology, international consensus, 448
Psychosocial adjustment, phenylketonuria, executive functions, 317
Psychotropic medication, anticonvulsant medication, behaviour disorders, 488

Qualitative approach, evaluation, individual planning services, 225
Quality of life
  disability policy, normalization, Norway, 120
  life domains, objective and subjective indicators, 126
  normalization, Norway, disability policy, 120
  Norway, disability policy, normalization, 120
  objective and subjective indicators, life domains, 126

Randomized control trials
  Journal of Intellectual Disability Research, prevalence, 232
  opportunistic health screening, primary health care, 409
  primary health care, opportunistic health screening, 409
  prevalence, *Journal of Intellectual Disability Research*, 232
Registers, vulnerability in a major incident, earthquake, 193
Reiss Screen for Maladaptive Behaviour, factor analysis, dual diagnosis, 346
Remediation, executive functions, Vygotsky-Luria approach, 144
Responsiveness, concentration, therapy, 201

Schizophrenia, pregnancy, birth complications, 238
Self-injurious behaviour
  avoidable death, mortality, 252
  body site preference, opioid hypothesis, 456
  mortality, avoidable death, 252
  opioid hypothesis, body site preference, 456
Sensory impairment, general practice, diagnosis, 422
Service consumption, mental health care, psychiatric services, 512, 519
Service trends, Europe, 112
Sexual abuse, men with intellectual disabilities, 215
Smoking education, preventative health strategies, education, 416
Social competence, depression, emotion recognition, 469
Social-emotional development, parenting stress, Cornelia-de-Lange syndrome, 70
Specialist health services, community care, England and Wales, 52
Speech, language, voice, Prader-Willi syndrome, 302
Staff, psychological well-being, challenging behaviour, 502
Staff explanations, staff strategies, challenging behaviour, 258
Staff perceptions, challenging behaviour, Challenging Behaviour Attributions Scale (CHABA), 495
Staff strategies, staff explanations, challenging behaviour, 258
Story description task, language, Down's syndrome, 165
Summer, neuroleptic malignant syndrome, 273

Terminal deletion of chromosome 3, behaviour disorders, 278
Therapy, concentration, responsiveness, 201

Voice, speech, language, Prader-Willi syndrome, 302
Vulnerability in a major incident, earthquake, registers, 193
Vygotsky-Luria approach, executive functions, remediation, 144
